

ML2021Spring HW2 Report

化工四 王韋翰

B06504102

Public Score	Private Score
0.76224	0.76256

The methods I used to pass the strong baselines include:

1. DNN model with batch normalization, ReLU, Dropout (Linear->ReLU->BN->DP)
2. Label smoothing
3. Feature selection
4. Training with full data
5. Early stop
6. Large batch size for shorter training time
7. Learning rate scheduler: ReduceLROnPlateau
8. Post processing (e.g. when encounter sequence such as 14,15,14 in prediction, change the middle one , i.e. 15 to 14)
